## RESEARCH STUDIES

2009. **Fresenius Focus Groups** – Study to assess patient experiences of in-center hemodialysis care and education. Tasks: Write moderator's guide, facilitate groups, develop final DVD.

2008. **Fresenius Focus Groups** – Study to assess patient experiences of in-center hemodialysis care and education. Tasks: Write moderator's guide, facilitate groups, write final paper.

2008. **DaVita at Home – Home Hemodialysis Caregiver Experiences** – Telephone interview study to explore the perceived burdens of home hemodialysis vs. in-center hemodialysis from the perspective of the caregiver. Tasks: Contribute to study protocol, edit interview guide and final paper.

2008. **DaVita at Home – Patient Quality of Life on Home Hemodialysis vs. In-center** – Telephone interview study to explore the lived experience of how patients’ quality of life is affected by a change from in-center to home hemodialysis treatment. Tasks: Contribute to study protocol, edit interview guide and final paper.

2007. **NxStage Focus Groups** - Study to assess differences between patients who chose daily home hemodialysis and those who were offered it but declined. Tasks: Program and contract management, edit moderator’s guide, conduct analyses, write final paper.

2006. **Life Options Internet Study** – Life Options study to assess hemodialysis patient education level and Internet use for health-seeking, both direct and indirect (i.e., via family and friends). Tasks: Design quantitative survey, obtain cooperation from large dialysis organizations, contribute to final report.

2006. **Medicare Dialysis Facility Compare Website Evaluation Phase 3**– MEI subcontract to Research Triangle Institute ((RFP) No. CMS-02-014/DB “Evaluation of Changes to the Dialysis Facility Compare Website.”) Tasks: Offer renal content/community expertise; review all materials and analyses; recruit dialysis chains, patients, family members, social workers, dietitians, nurses, CKD patients and family members for focus groups and cognitive interviews in San Antonio, Boston, and New Haven.

2005. **Chronic Kidney Disease Self-management Study** – Life Options study to assess self-management participation, functioning and well-being, hemoglobin, serum creatinine, and serum albumin among 250+ CKD patients in Virginia and Florida. Tasks: Program and contract management, review protocol and all forms, negotiate with study sites, review analyses and final paper.

2004. **Intradialytic Hypertension Study** – Synephros study to assess nurse management of IDH in dialysis clinics. Tasks: Design qualitative and quantitative approach to evaluate nurse behavior to prevent and manage IDH. Develop survey tools, recruit subjects, analyze data, contribute to final report.

2004. **Medicare Dialysis Facility Compare Website Evaluation Phase 2**– MEI subcontract to Research Triangle Institute ((RFP) No. CMS-02-014/DB “Evaluation of the Content of Dialysis Facility Compare Website.”) Tasks: Offer renal content/community expertise; review all materials and analyses; recruit dialysis chains, patients, family members, nephrologists, social workers, dietitians, nurses, technicians, CKD patients and family members for cognitive interviews in San Antonio, Boston, and New Haven.

2003. **Medicare Dialysis Facility Compare Website Evaluation** – MEI subcontract to Research Triangle Institute ((RFP) No. CMS-02-014/DB “Evaluation of the Content of Dialysis Facility Compare Website.”) Tasks: Offer renal content/community expertise; review all materials and analyses; recruit dialysis chains, patients, family members, nephrologists, social workers, dietitians, nurses, technicians, CKD patients and family members for interviews and focus groups in Washington DC, Atlanta, Chicago, Los Angeles. Facilitate some groups.

2003. ***Voice Activated Telephone System (VATS) study*** – MEI subcontract to Adherence Technologies SBIR Grant through the U.S. Dept. of Education. Tasks: Offer renal content/community expertise; review all materials and analyses; recruit dialysis center social workers and patients in a pilot study among 50 patients to validate a telephone version of the SF-36 against the paper-and-pencil version.

2002. ***CKD Symptom Management Study*** – Life Options study to assess symptom prevalence, burden, and management among 307 randomly selected dialysis patients. Tasks: Program and contract management, review protocol and all forms, review analyses, contribute to final paper.

2000. ***Diabetes Patient Focus Groups*** – Amgen study to assess diabetes patients' knowledge of kidney disease and treatment, risk for kidney disease, diabetes education experience, and relationships with care providers. Tasks: Program and contract management, develop focus group guide, protocol, and all forms, attend 4 groups in Chicago and San Francisco, and develop analyses, write final paper.

2000. ***Diabetes Educator Interviews*** – Amgen study to assess diabetes patient educators' perspectives on patient education regarding kidney disease and treatment, unmet needs, materials used, and curricula. Tasks: Program and contract management, develop interview guide, protocol, and all forms, recruit renal social worker to conduct interviews, develop analyses, write final paper.

2000. ***Chronic Kidney Disease Focus Groups*** – Amgen study to assess CKD patients' knowledge of kidney disease and treatment, risk for kidney disease, education experience, and relationships with care providers. Tasks: Program and contract management, develop focus group guide, protocol, and all forms, attend 4 groups in Chicago and San Francisco, and develop analyses, write final paper.

2000. ***CKD Patient Telephone Interviews*** – Amgen study to assess CKD patients' knowledge of kidney disease and treatment, education experience, and relationships with care providers. Tasks: Program and contract management, develop phone interview guide, protocol, and all forms, recruit renal social worker to conduct interviews, develop analyses, write final paper.

2000. ***CKD Educator Interviews*** – Amgen study to assess CKD patient educators' perspectives on patient education regarding kidney disease and treatment, unmet needs, materials used, and curricula. Tasks: Program and contract management, develop interview guide, protocol, and all forms, recruit renal social worker to conduct interviews, develop analyses, write final paper.

1999. ***ESRD Patient Focus Groups*** – Amgen study to assess dialysis patients' knowledge of kidney disease and treatment, education experience, and relationships with care providers. Tasks: Program and contract management, develop focus group guide, protocol, and all forms, attend 4 groups in Chicago and San Francisco, and develop analyses, write final paper.

1999. ***ESRD Patient Telephone Interviews*** – Amgen study to assess dialysis patients' knowledge of kidney disease and treatment, education experience, and relationships with care providers. Tasks: Program and contract management, develop phone interview guide, protocol, and all forms, recruit renal social worker to conduct interviews, develop analyses, write final paper.

1999. ***Patient Opinion Study Part A*** – Life Options study to assess 30 dialysis patients' experiences seeking and acquiring information about kidney disease and its treatment. Tasks:

Project management, develop phone interview guide, conduct interviews, develop analyses, write final paper.

1999. **Patient Opinion Study Part B** – Life Options study to assess 30 dialysis patients’ experiences with symptom identification and management. Tasks: Project management, develop phone interview guide, conduct interviews, develop analyses, write final paper.

1999. **Patient Opinion Study Part C** – Life Options study to assess 30 dialysis patients’ experiences of rehabilitation. Tasks: Project management, develop phone interview guide, conduct interviews, develop analyses, write final paper.
